A pilot to connect your operations

Commercial pilot at a reduced cost

We propose a limited-scope pilot to evaluate continuity between services, vehicles, drivers, Traffic, Workshop and Management. Objectives, data, duration, price and acceptance criteria will be agreed before starting.

What to evaluate

An incident and response workflow; coordination between responsible teams; documentation and traceability; and useful information for decisions. Scope depends on each operator’s needs and available interfaces.

How to take part

We can travel to your premises for a live demonstration and a scoping session. Pilot collaboration will receive preferential commercial attention if you later implement the system: support and implementation terms will be defined in the proposal, without an obligation to continue.

Meet us in Badalona

On Wednesday 25 November 2026 we can meet you from 11:00 to 16:00 at BCIN during I Jornada Badalona Emprenedora. Reply or call to agree a time. The overall event is advertised from 09:30 to 17:00.
